

SIDDHANT JAIN

siddhantjain1077@gmail.com | +91-9870544193 | [LinkedIn](#)

Full-stack developer and final-year BCA student (JIIT) with production-deployed projects, an industry internship in a government utility company, and hands-on experience building REST API platforms, Android apps, and responsive web dashboards. Seeking a Software Development role where I can contribute across the stack from day one.

EXPERIENCE

BSES Rajdhani Power Limited — IT Intern

June 2025 – July 2025

AMPS App with API Integration | New Delhi

- ▶ Designed and deployed the AMPS (Automated Metering & Processing System) App to streamline utility data management across multiple backend APIs, reducing manual data retrieval steps.
- ▶ Built the application interface with real-time API connectivity to internal backend databases, ensuring data consistency under the supervision of the IT department's General Manager.
- ▶ Delivered the complete project within an 8-week window, meeting all technical requirements and signing off with senior engineering staff approval.

PROJECTS

PulseAPI — API Monitoring & Uptime Tracking Platform | *React.js · Node.js · Express.js · MySQL · JWT · Vercel · Railway* -

[GitHub](#) | [Live Demo](#)

- ▶ Built and deployed a full-stack REST API monitoring dashboard allowing users to register, track, and manage multiple API endpoints with real-time health checks and uptime analytics.
- ▶ Implemented JWT-based authentication, bcrypt password hashing, protected route middleware, and per-user endpoint isolation across Node.js/Express.js backend and MySQL database.
- ▶ Engineered scheduled background monitoring jobs (Axios) that record HTTP status, response time, uptime %, and failure logs — visualized via Recharts on a responsive dashboard.
- ▶ Deployed frontend on Vercel and backend + MySQL on Railway with environment-based config, CORS handling, and production-ready error management.

Weather App — Native Android Forecast App | *Java · Android SDK · XML · REST APIs · JSON Parsing* - [GitHub](#)

- ▶ Developed a native Android application in Java providing real-time weather data (temperature, humidity, wind speed) via third-party REST API integration with live JSON parsing.
- ▶ Designed adaptive XML layouts ensuring consistent UI rendering across multiple Android screen sizes and densities.

Grocery Management System — Inventory & Analytics Tool | *Python · MySQL · Pandas · Matplotlib* - [GitHub](#)

- ▶ Built a CLI-based inventory management system with persistent MySQL storage and full CRUD operations for products, pricing, and stock levels.
- ▶ Automated sales and cost-trend analysis using Pandas and Matplotlib, generating visual charts to support purchasing decisions.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, C

Frontend: React.js, HTML5, CSS3, XML (Android)

Backend: Node.js, REST API design, JWT Authentication

Database: MySQL (schema design, CRUD, relational queries)

Mobile: Android SDK (Java), React Native

Tools & Platforms: Git, GitHub, Postman, Android Studio, Vercel, Railway

Design: UI/UX Design, Graphic Design, Video Editing

[Designs](#)

EDUCATION

Jaypee Institute of Information Technology (JIIT)	Sept 2022 – May 2026
B.C.A. (Bachelor of Computer Applications) CGPA: 7.0 Noida, India	
Ryan International School, Ghaziabad	Class XII CBSE
Ryan International School, Delhi	Class X CBSE

LEADERSHIP & EXTRACURRICULARS

Digital Head — Game Development Hub, JIIT	2025 – 2026
▶ Led all digital operations for the club including event promotion, social media presence, graphic design, and video production for 5+ college-level events.	
Digital Volunteer — Optica JIIT Hub, JIIT	2024 – 2025
▶ Created promotional design assets and managed digital visibility for club events and workshops.
